Line Out Press Release - August 2003 – LOPR0001

We here at Line Out Records headquarters are proud to announce the birth of our latest project: 'Line Out'.

Line Out Is

Line Out is a monthly electronic music event which will feature a selection of Line Out Records' artists plus additional musicians and DJs from around the country. We intend to run the Line Out events at a different venue, in a different town each month as much as is possible, with the first event taking place in Maidenhead (our home town), and returning to Maidenhead (and the area) every few months.

The purpose of these events is to launch fresh and interesting music onto an unsuspecting public in such a manner as to surprise and beguile with the feast of entertainment directed at them.

The music will be performed both live and via the medium of DJs, the musical genres may well include (but will not be limited to):

Electronica, IDM, EBM, Darkwave, Synthpop, Ambient, Trance, Techno, Trip-Hop, Industrial, Noise, Electro-Prog and other forms of alternative electronic music.

We intend for these events to be free entry for the public, but of course this may be restrained by some of the venues we choose to visit with our artistic vision, in these cases the cost to the visiting public will be kept to a minimum.

Line Out is to be open to new and established artists alike. Artists that wish to take part in the project should contact us through the usual means. We are interested in (but not limited to), musicians, film makers, DJs (of varying types), and anyone else who feels they may be able to make a contribution.

Up to date details of the Line Out events (and any other events we may be involved with) can always be found on the Line Out Records website: www.lineoutrecords.com To be kept even more up to date there is a mailing list which can be subscribed to by mailing subscribe@lineoutrecords.com

In summary

We are bringing good things to a town near you soon. Alternative electronica has never tasted quite so fresh and minty.

-ends-
