Outlines v1.0 Released

Line Out Records announce the release of the compilation Outlines V1.0, a blend of technopop, industrial and electronica from our own stable and from the cream of the bands we've worked with as live music promoters in a previous incarnation.

We were delighted so many people were eager to work with us again and are even more delighted with the results - ten artists, fifteen tracks - a record that emphasises consistence of quality over consistence of style. Eclecticism never sounded so good. You will like it all, but everyone you know will disagree about which are the best tracks.

All the bands are active on the live scene anywhere they let you play without a real drummer or an acoustic guitar. All the bands have forthcoming albums, some to be released through ourselves of course and some of them have a few albums behind them too.

Outlines V1.0 is the first full scale release from Line Out Records. Line Out Records is a fledgling independent label, but we have been involved with live music promotion, the local music scene, DJing and generally all of the things you expect people to have done before starting a record company, for several years.

If you would like a copy for review, any more information or promotional material please contact Bob at Line Out – bob@lineoutrecords.com / 01628 627289
